

We have implemented the new Bitdefender email security platform which is based on Mesh's Email Gateway Security platform which will help to protect against threats and spam. To ensure we don't incorrectly block an email you need, a tiny fraction of your email will end up in quarantine. These emails will be shown in quarantine digests which you will receive three times a day: 9 a.m., 12 p.m. and 4 p.m. Digests will only be delivered if there has been an email quarantined since your last digest. Emails are quarantined for 28 days after which they are automatically deleted. It is very IMPORTANT that you help train your digest by understanding the following:

### Categories Explained

● You can deliver

● You can only request delivery (notifies your IT admin)

Threats	Spam	Policy	Clean
Malware <span style="color: red;">●</span>	Definite Spam <span style="color: green;">●</span>	Infomail <span style="color: green;">●</span>	Already Delivered
Phishing <span style="color: red;">●</span>	High Spam <span style="color: green;">●</span>	Banned Attachments <span style="color: red;">●</span>	
Impersonation <span style="color: green;">●</span>	Likely Spam <span style="color: green;">●</span>	Geo filter <span style="color: red;">●</span>	

### Actions Explained

<b>Deliver</b>	<b>Always Allow Sender Address</b>	<b>Always Allow Sender Domain</b>
Releases the email from quarantine and delivers to your mailbox immediately.	Future emails from this sender will be delivered, bypassing quarantine. Threats and certain policy verdicts will still be quarantined.	Future emails from this domain will be delivered, bypassing quarantine. Threats and certain policy verdicts will still be quarantined.
<b>Delete</b>	<b>Always Block Sender Address</b>	<b>Always Block Sender Domain</b>
Deletes the email from quarantine.	Future emails from this sender will be automatically deleted and not shown in quarantine.	Future emails from this domain will be automatically deleted and not shown in quarantine.
<b>Preview</b>	<b>Request</b>	
Allows you to view email content before taking an action.	Sends a notification to your admin requesting the email is released from quarantine.	
<b>Login</b>	<b>Digest on Demand</b>	
Allows you to login to manage your quarantine and personal allow/block rules.	A new digest delivered instantly if new email quarantined since your last digest.
