

We have implemented the new Bitdefender email security platform which is based on Mesh's Email Gateway Security platform which will help to protect against threats and spam. To ensure we don't incorrectly block an email you need, a tiny fraction of your email will end up in quarantine. These emails will be shown in quarantine digests which you will receive three times a day: 9 a.m., 12 p.m. and 4 p.m. Digests will only be delivered if there has been an email quarantined since your last digest. Emails are quarantined for 28 days after which they are automatically deleted. It is very **IMPORTANT** that you help train your digest by understanding the following:

Categories Explained

 You can deliver

 You can only request delivery (notifies your IT admin)

Threats	Spam	Policy	Clean
Malware 	Definite Spam 	Infomail 	Already Delivered
Phishing 	High Spam 	Banned Attachments 	
Impersonation 	Likely Spam 	Geo filter 	

Actions Explained

Deliver

Releases the email from quarantine and delivers to your mailbox immediately.

Always Allow Sender Address

Future emails from this sender will be delivered, bypassing quarantine. Threats and certain policy verdicts will still be quarantined.

Always Allow Sender Domain

Future emails from this domain will be delivered, bypassing quarantine. Threats and certain policy verdicts will still be quarantined.

Delete

Deletes the email from quarantine.

Always Block Sender Address

Future emails from this sender will be automatically deleted and not shown in quarantine.

Always Block Sender Domain

Future emails from this domain will be automatically deleted and not shown in quarantine.

Preview

Allows you to view email content before taking an action.

Request

Sends a notification to your admin requesting the email is released from quarantine.

Login

Allows you to login to manage your quarantine and personal allow/block rules.

Digest on Demand

A new digest delivered instantly if new email quarantined since your last digest.

Once you open your quarantine digest email, it will typically appear as so:

Your Quarantine Digest

Hi [REDACTED] [REDACTED]m, you have newly quarantined email (6).

InfoMail

Nov 5 11:31

Norlan <[contact@\[REDACTED\].com](mailto:contact@[REDACTED].com)>

Limited [REDACTED] Now Available

[Delete](#)

Spam

Nov 5 10:51

Slack <[no@\[REDACTED\].slack.com](mailto:no@[REDACTED].slack.com)>

Confirm your email address on Slack

[Deliver](#)

[Preview](#)

[Delete](#)

If you choose the **Deliver** option, the current email will be immediately delivered and you will be given the following choices:

You can either choose if you want that exact email address to always be allowed or the domain to always be allowed (this will mean any email address from that domain will be delivered).

On the other hand, if you select **Delete**, the current email will immediately be deleted and you will be given the following choices:

Email has been deleted

Create user-level rule?

- Always block sender (inf[REDACTED].com)
- Always block sender domain (p[REDACTED].com)

Cancel

Confirm

BE VERY CAREFUL WITH YOUR CHOICE IN THIS MATTER!! You can either choose if you want that exact email address to always be deleted or the domain to always be denied - this means any email from that domain will always be held in quarantine. The system is smart enough to not give you the option to block a known sender domain like "outlook.com" or "gmail.com".
