

**MAKE SURE** you have your LastPass account setup before going through this procedure.

Once you receive the welcome email, make sure you click on the **Create GravityZone** password link at the bottom of the email **BEFORE** logging in:

The first time you click on the link, it will ask you to setup a password using the requirements listed (12 characters, one digit, one upper case one lower case and one special character) - the text will stay red until you type in an accepted password:

A screenshot of the Bitdefender GravityZone password creation page. The page features the Bitdefender GravityZone logo at the top left. Below the logo, there's a heading 'Create password'. There are two input fields: the first is labeled 'Enter new password' and the second is labeled 'Click here to retype your password'. Below these fields, a message states: 'The password must meet the minimum complexity requirements: 12 characters length, one digit, one upper case, one lower case and one special character.' A blue button labeled 'Save and Login' is positioned at the bottom right of the form.

Enter and then retype your password. If Bitdefender accepts it, you will be able to click the **Save and Login** button to take you to the MFA Setup:

Enable two-factor authentication

To enable the two-factor authentication:

1. On your device, download and install Google Authenticator, Microsoft Authenticator, or any two-factor TOTP (Time-Based One-Time Password Algorithm) authenticator, compatible with the [standard RFC6238](#).
2. Use the Authentication app you have opted for to scan the QR code, or enter the secret key manually:

3. Save the secret key:

Information

Before activating the two-factor authentication, save this code in a safe location. You may need to use another authentication app when logging in to GravityZone. In this case, you will need to add the code manually.

Print a backup

4. Enter the code provided by the authentication app.

Authentication code:

The authentication app automatically generates a new unique token each 30 seconds. Open the app to obtain the GravityZone token.

Enable

Skip

Cancel

Scan the QR Code with your mobile device that has your LastPass account on it to add the account. The account will be added as 'Gravity+Zone+Cloud' with your account email below it.

**MAKE SURE** you copy and save the secret key in a safe place. This secret key will allow you to get into your account **ONE TIME** if for some reason your LastPass account is not working

Go ahead and type in the Authentication code and then click the **Enable** button.

Agree to the EULA terms by placing a check mark in the box and then click the **Continue** button:

Bitdefender Terms of Service

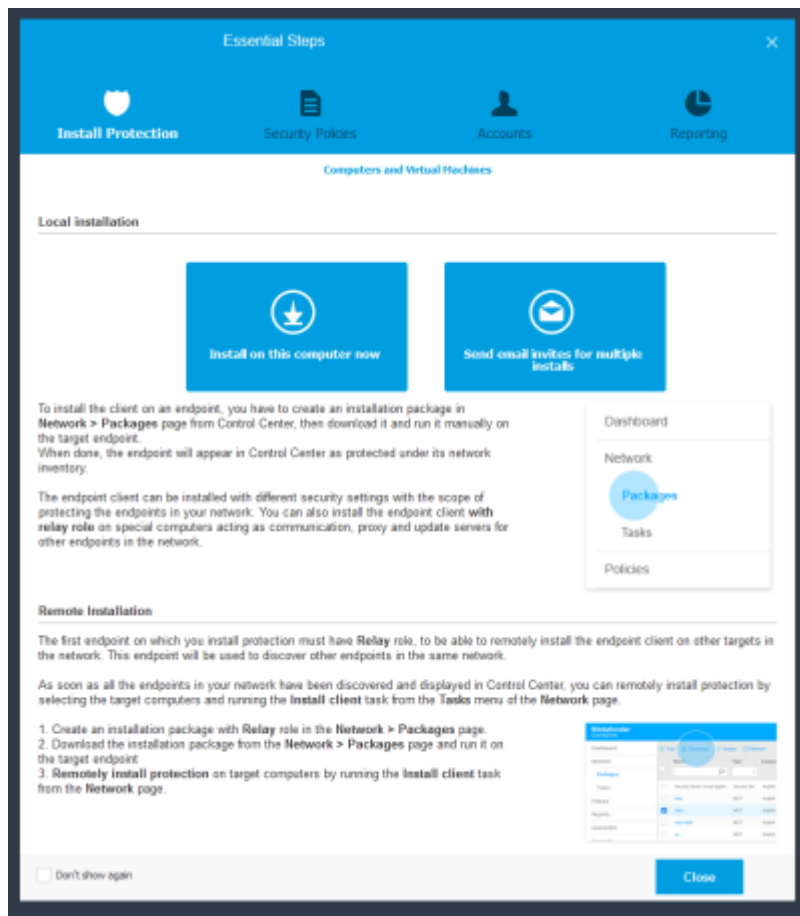

Before you continue, please take a moment to acknowledge and accept the Bitdefender Terms of Service.

☐ I agree with this [EULA](#) terms and conditions in respect to this product and the use of this product

Cancel

Continue

Once you do so, you will be presented with the Essential Steps for creating Installations and Policies:

Although you have the ability to do so with this account, all of this is already setup and done for you. I would advise you not to make any changes to this information. You can click on the **Don't show again** check box at the bottom to stop this form from popping up when you log in. Click the **Close** button to continue.
