

Make sure you have your LastPass account setup before activating your Hudu account. Wait for your welcome email and when you receive it, click on the link to **Start setting up my account** →

ayed, click here to view it in a web browser.

You have been invited to join ComputersDOTCalm:
[Start setting up my account →](#)

Once you click on the link, you will be asked to create a password.

The screenshot shows a registration form titled "Finish Sign Up". It contains four input fields: "Your First Name", "Your Last Name", "Your new password", and "Confirm the new password". Each password field has a red eye icon to toggle visibility. At the bottom of the form is a blue button labeled "Complete Registration →". The footer of the form reads "© 2024 - ComputersDOTCalm".

Enter in your name and create a strong password. When done, click the **Complete Registration** button to continue.

[Go to Dashboard](#) [Go to Settings](#) [Sign out](#)

Configure 2FA

1. There are multiple apps that provide two-factor authentication, we have listed two suggested options here:

Authy (recommended)

[Download on iPhone](#) [Download on Android](#)

Google Authenticator

[Download on iPhone](#) [Download on Android](#)

2. After downloading, open the app on your phone and click the + or **New** button and scan the QR code below:

Can't scan? Use this key: X [REDACTED] X

3. Enter the code from your phone to confirm the scan was successful:

Code

[Activate 2FA](#)

Scan the QR code with your LastPass Authenticator app on your mobile device and enter in the code in the space provided. When done, click the **Activate 2FA** button to continue.

If everything looks correct, click the **Return to Dashboard** button at the top to log into your Hudu profile.
