Once you receive the welcome email from LastPass, click on the Activate LastPass button in the email.

Fill in the activation code from the email and make sure that your email address is correct.
Make sure you create a strong master password - the Strength Meter will show you how your are doing.
Here are some suggestions on creating a strong password that you can remember.

Build a strong master password

Summary

The first step in setting up your LastPass account is creating a strong, unique master password. Use a password that's memorable because LastPass won't save it for you. It's the only password you have to remember.

As you'll see in the video, we recommend using a "passphrase" for your master password, like tony$growler$venT$15 - it's meaningless to others and difficult for hackers to guess, but something you can commit to memory.

Here are a few more reasons why phrases make the best passwords:

- They're longer, usually 12-20 characters
- They're completely random
- They're easy to say and read

Plus, they are fun to think up - so get creative!

Account activation

Complete this form to activate your account

New Master Password
👁

Strength

Our minimum requirements:

⬤ Strength meter at maximum

⬤ At least 12 characters long

⬤ At least 1 number

⬤ At least 1 lowercase letter

⬤ At least 1 uppercase letter

⬤ At least 1 special character

Our advice:

Ideally, use a randomly generated master password.

A good example is: *r50$K28valFYxaY*

Tip: Use the LastPass password generator to create a strong, unique master password.
