

In order to connect to a SharePoint site with an email account external to the domain hosting the site, you will need to follow these steps.

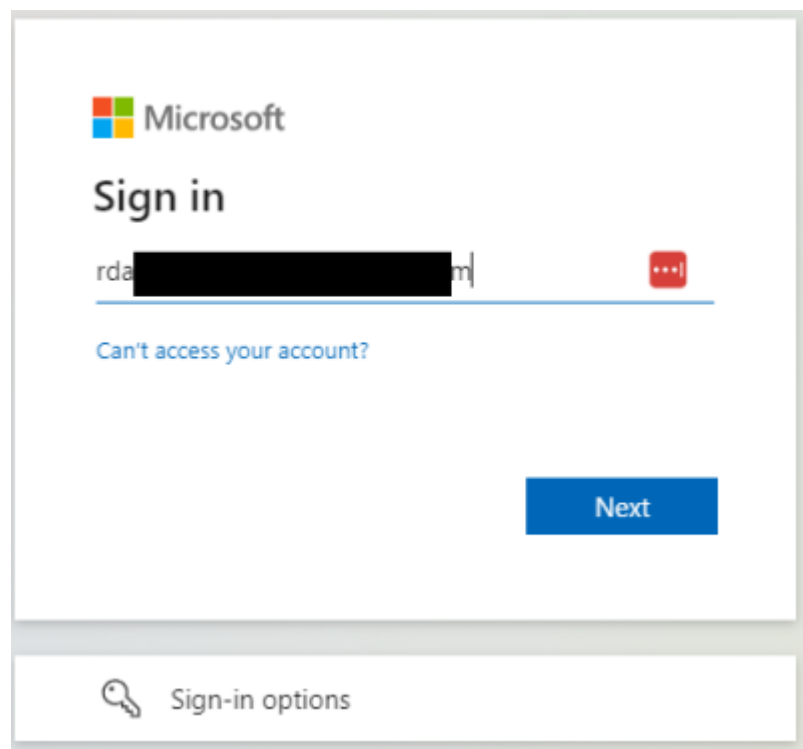

In your email client, locate the Welcome Email for the new SharePoint site and open it.

SharePoint ... CDC Solutions Support wants to share Networking 4 Success
<https://computers[REDACTED]ss/_layouts/15/images/ExternalSharingWhiteLogo.png>

Click on the Link provided for the new site.

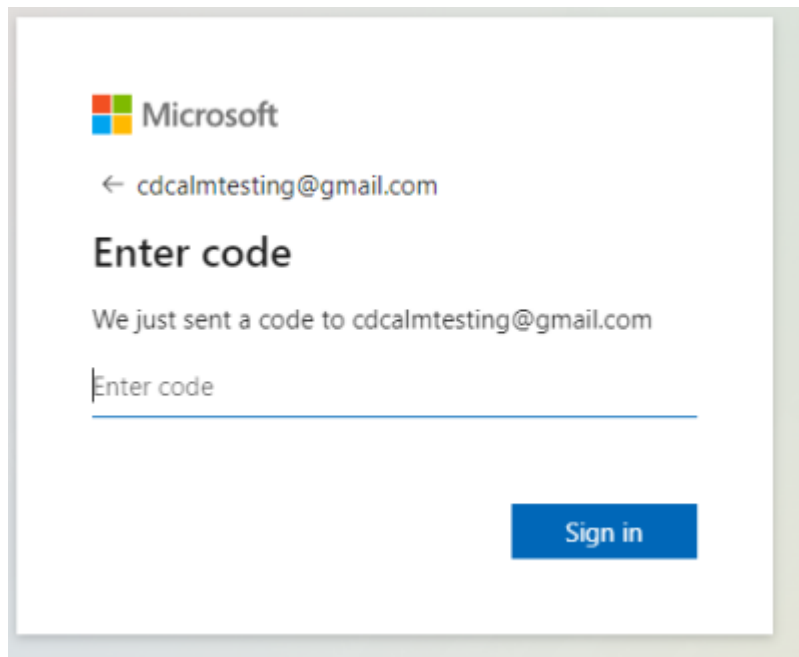

Use the email account you have used for the group to sign in with.

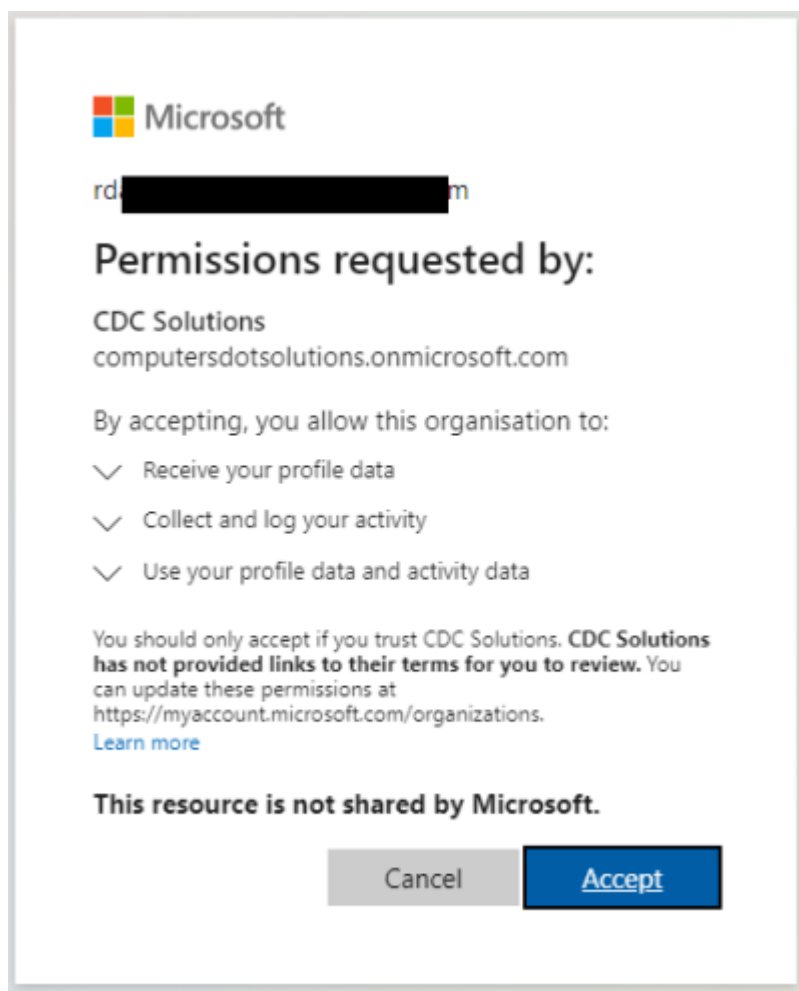

If this email account is an existing Microsoft email account, go ahead and use your current password for that email.

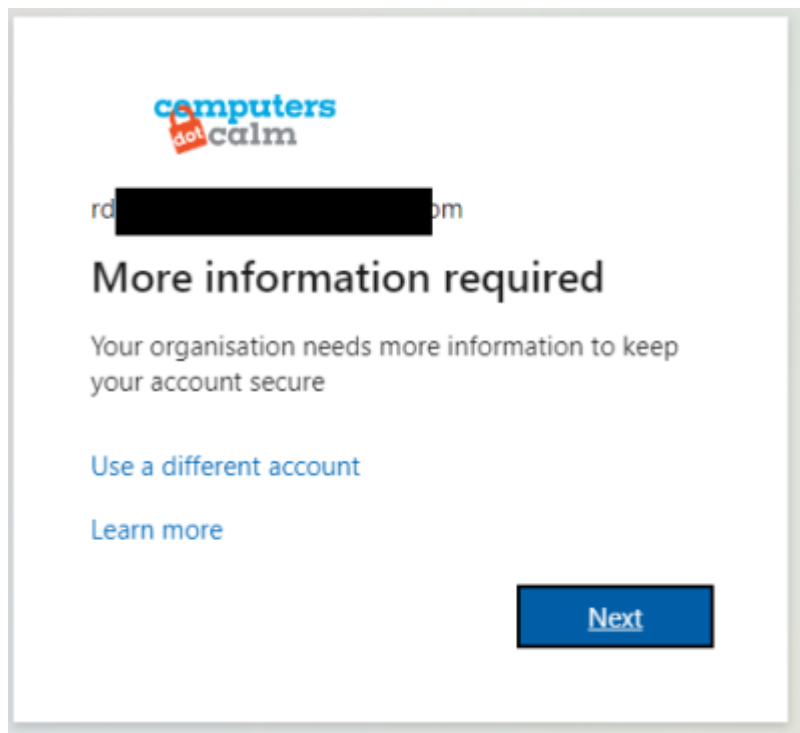

If this email account is NOT an existing Microsoft email account, if you are presented with a password, click the link to send a code, otherwise, Microsoft should send a one time code to the email address you are using.

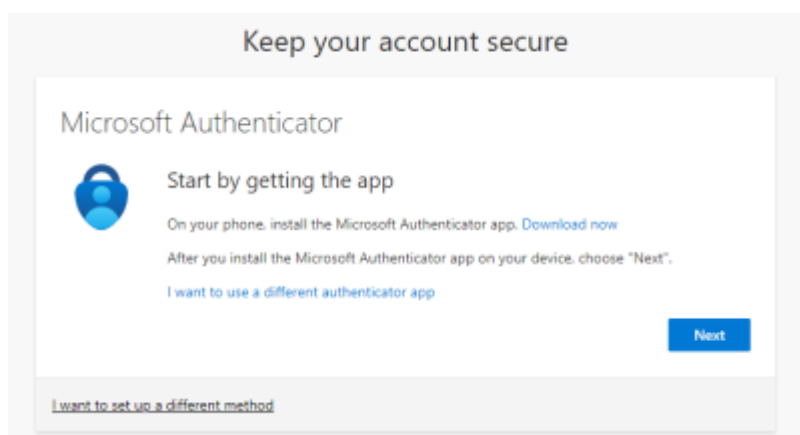

Once you receive the code, enter it in the space provided.
In both cases, once you have logged in successfully, you will be asked to accept the Permissions for the site.

click the **Accept** button to continue.

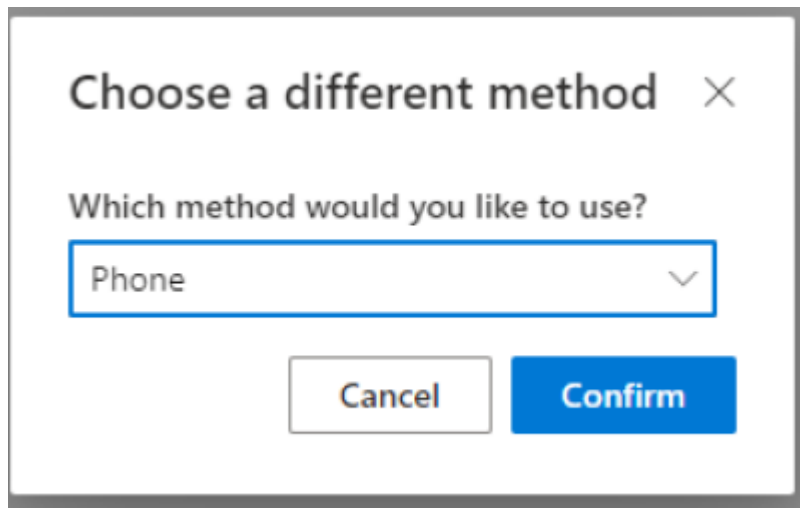

Click the **Next** button to continue to setup up 2FA/MFA for the site.

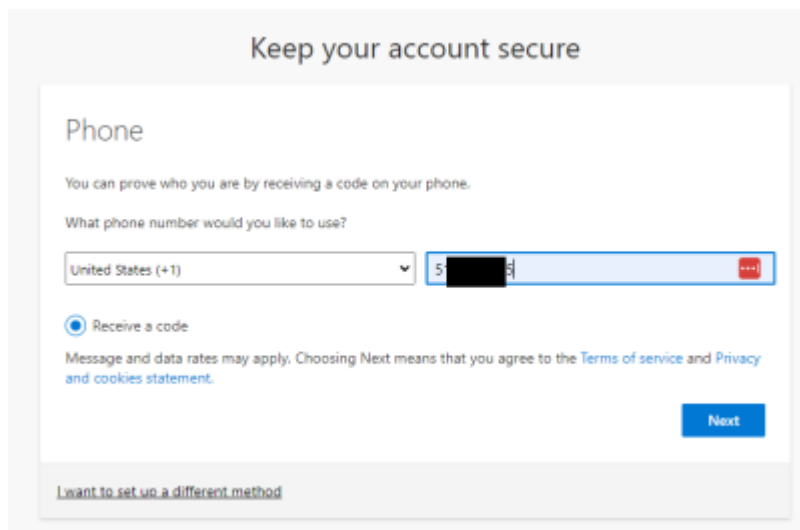

If you already have Microsoft Authenticator setup on your mobile device, go ahead and use it. If you have another MFA app setup like LastPass, click the **I want to use a different authenticator app** link and set it up using that wizard. As a refresher, you can use the link for <https://wiki.computersdotcalm.com/doku.php?id=microsoft:add-lastpass-mfa> on this site on how to do that. If you have neither setup, click the link for **I want to set up a different method** at the bottom of the form to use your cell phone for authentication.

If you will be using just your cell phone for the authentication instead of a MFA app, once you click the **I want to set up a different method** link, you will be asked what method to use.

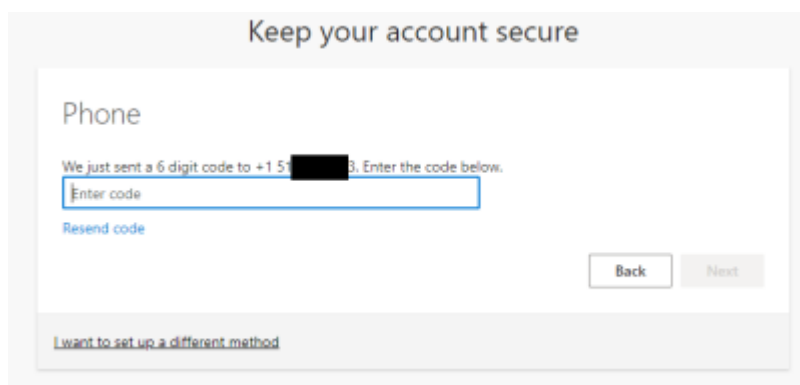

A dialog box titled "Choose a different method" with a close button (X) in the top right corner. Below the title, it asks "Which method would you like to use?". There is a dropdown menu currently showing "Phone". At the bottom, there are two buttons: "Cancel" and "Confirm".

Change the drop down to **Phone** and then click the **Confirm** button to continue.

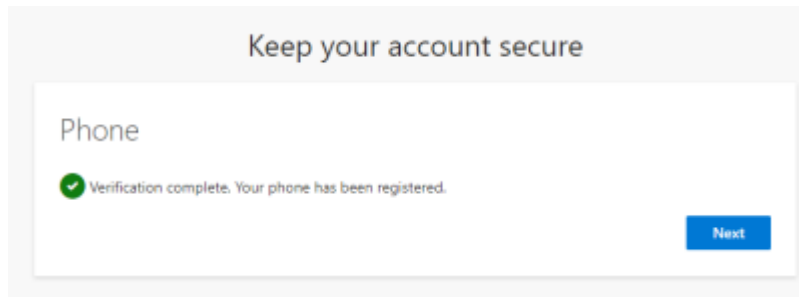

A page titled "Keep your account secure" with a sub-header "Phone". It says "You can prove who you are by receiving a code on your phone." and "What phone number would you like to use?". There is a dropdown menu for the country (currently "United States (+1)") and a text input field for the phone number (partially masked with black boxes). Below the input field, there is a radio button labeled "Receive a code" which is selected. A note states: "Message and data rates may apply. Choosing Next means that you agree to the [Terms of service](#) and [Privacy and cookies statement](#)." At the bottom right is a blue "Next" button. At the bottom left is a link: "I want to set up a different method".

Enter in your phone number in the space provided and then click the **Next** button to continue.

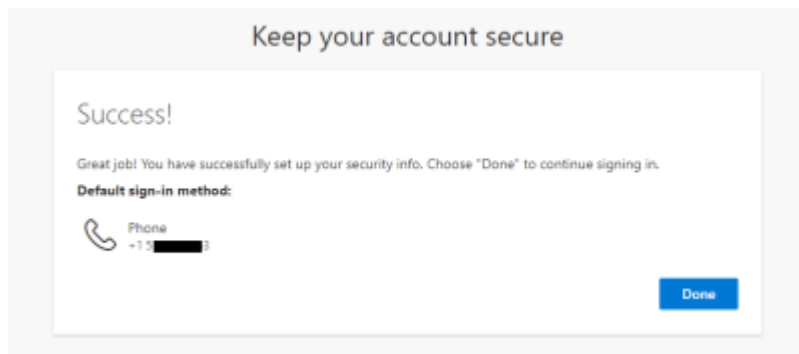

A page titled "Keep your account secure" with a sub-header "Phone". It says "We just sent a 6 digit code to +1 51 [redacted] 3. Enter the code below:". There is a text input field labeled "Enter code". Below the input field is a link "Resend code". At the bottom right are two buttons: "Back" and "Next". At the bottom left is a link: "I want to set up a different method".

Once you receive the code on your phone, go ahead and enter it in the space provided and then click the **Next** button to authenticate.

When successful, click the **Next** button to continue.

Click the **Done** button to continue to the SharePoint site.
